AMENDMENT UNDER 37 C.F.R. § 1.111

Commissioner for Patents
Washington, D.C. 20231

Sir:

In response to the Office Action dated September 11, 2002, please amend the above-identified application as follows:

IN THE SPECIFICATION:

Please enter the following amendments to the specification:

Page 2, paragraph 3:

The silver oxide zinc battery, in which silver oxide is used as a positive active material, zinc is used as a negative active material, and potassium hydroxide aqueous solution is used as an electrolyte, has features of a high output and a high energy density, but a defect of high cost. Therefore, its larger scale type has been mainly used for space and deep-sea equipment, whereas its small scale type has been widely used for a watch or an electronic calculator.

Page 4, paragraph 3:

Conventionally, connection between the battery and the appliance using the battery has been
